-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on application filed December 8, 2000
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11; 453 O.G. 213.

## Disposition of Claims

- 4) ☒ Claim(s) 1 is/are pending in the application.
- 4a) Of the above, claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claims \_\_\_\_\_ are subject to restriction and/or election requirement.

## Application Papers

- 9) ☒ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are objected to by the Examiner.
- 11) ☐ The proposed drawing correction filed on \_\_\_\_\_ is: a) ☐ approved b) ☐ disapproved.
- 12) ☐ The oath or declaration is objected to by the Examiner.

## Priority under 35 U.S.C. § 119

- 13) ☐ Acknowledgement is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d).
- a) ☐ All b) ☐ Some\* c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
  - ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_
  - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\*See the attached detailed Office action for a list of the certified copies not received.

- 14) ☐ Acknowledgement is made of a claim for domestic priority under 35 U.S.C. § 119(e).

## Attachment(s)

- 15) ☒ Notice of References Cited (PTO-892)
- 16) ☒ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 17) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s). \_\_\_\_\_
- 18) ☐ Interview Summary (PTO-413) Paper No(s). \_\_\_\_\_
- 19) ☐ Notice of Informal Patent Application (PTO-152)
- 20) ☒ Other: Rule 1.105 Requirement

**Detailed Action**

**Drawing Notification**

The submitted photographic illustrations filed December 8, 2000 have been objected to by an Official Draftsperson under 35 CFR 1.165(a) for the reasons set forth on the attached PTO-948. By way of explanation, the paper on which the photographic illustration is printed is of insufficient weight and the quality of the photographic illustration is poor, i.e. dark and blurry, (37 CFR 1.84(b)). The proper type (weight) of paper to be used is bristol board or photographic double-weight paper.

The submitted photographic illustrations filed March 19, 2001 have been approved by an Official Draftsperson.

Since applicant has filed an additional photographic illustration on March 19, 2001, it appears applicant would like to use this photographic illustration in place of the originally filed photographic illustration. If such is the case, applicant should specify that the photographic illustration filed March 19, 2001 is to be used and cancel the other photographic illustration (filed December 8, 2000). Clarification is necessary.

The rules for submitting drawings, 37 CFR 1.84 and 37 CFR 1.165, were amended effective November 29, 2000. The USPTO has delayed enforcement of these changes until October 1, 2001. Drawings in compliance with the old rules will be accepted through September 30, 2001. Complete details can be found in the May 22, 2001 *Official Gazette* (1246 OG 106-

**Detailed Action**

107) or on the Internet at:

<http://www.uspto.gov/web/offices/com/sol/og/2001/week21/patwavr.htm>.

**Objection to the Disclosure**

**37 CFR 1.163**

The following is a quotation of section (a) of 37 CFR 1.163:

(a) The specification must contain as full and complete a disclosure as possible of the plant and the characteristics thereof that distinguish the same over related known varieties, and its antecedents, and must particularly point out where and in what manner the variety of plant has been asexually reproduced. In the case of a newly found plant, the specification must particularly point out the location and character of the area where the plant was discovered.

**35 USC § 112**

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

As specific to United States Plant Patent applications, the specifics of 37 CFR 1.164 (reproduced below) are controlling:

**Detailed Action**

The claim shall be in formal terms to the new and distinct variety of the specified plant as described and illustrated, and may also recite the principal distinguishing characteristics. More than one claim is not permitted.

In plant applications filed under 35 U.S.C 161, the requirements of 35 U.S.C. 112 are limited. The following is a quotation of 35 U.S.C. 162:

No plant patent shall be declared invalid for noncompliance with section 112 of this title if the description is as complete as is reasonably possible. The claim in the specification shall be in formal terms to the plant shown and described.

The disclosure is objected to under 35 CFR 1.163(a) and under 35 U.S.C. 112, first paragraph, because the specification presents less than a full, clear, and complete botanical description of the plant and the characteristics which define same per se and which distinguish the plant from related known cultivars and antecedents.

More Specifically:

A. Applicant should set forth in the specification information regarding whether the instant plant was an induced mutation or a naturally occurring mutation of 'Melody'. If such mutation was induced, applicant should set forth the artificial mutagen(s) and methodology which was used to arrive at the instant plant. If such mutation was naturally occurring, applicant could import into the specification a statement such as, for example, if accurate, "The instant plant was a naturally occurring vegetative mutation discovered as a single plant growing in a cultivated

**Detailed Action**

planting of 'Melody'. Correction and/or clarification is necessary. The origin of the plant must be clearly and unambiguously set forth.

B. Applicant is requested to set forth in the specification whether the parental cultivar, 'Melody' has been patented in the United States, is currently the subject of a pending U.S. Plant Patent application, or unpatented. If patented, --(U.S. Plant Patent No.)-- should be inserted after the cultivar name. If the subject of a pending application, such should be referred to by serial number. If unpatented, --(unpatented)-- should be inserted after the appropriate cultivar name.

C. Page 1, line 8, Applicant recites "The new variety was first asexually reproduced by cuttings in 1997.". Applicant then states "The data which defines these characteristics were collected by asexual reproductions carried out in Dresden, Germany." at lines 16 and 17 of the same page. Applicant should set forth in the specification (page 1, line 8) where the variety was first asexually reproduced and set forth the type of "asexual reproductions", i.e. cuttings or other, at page 1, lines 16 and 17 (37 CFR 1.163(a)).

D. Page 1, lines 15-19, Applicant should set forth in the specification the age of the plants when described and container size (if grown in a container).

**Detailed Action**

E. Applicant should set forth in the specification the typical and observed plant width or spread.

F. In addition to the leaf length set forth at page 1, line 31, applicant should set forth the typical and observed leaf width.

G. Page 1, line 32 and page 3, line 3, Applicant states "ondulated". "Ondulated" is an unrecognized term. It appears applicant may have intended to state --undulate--. Correction and/or clarification is necessary.

H. Page 2, line 1, Applicant sets forth color designations for the instant plant's foliage. However, applicant has not specified whether the color designations set forth are for the upper, lower, or both surfaces. Applicant should set forth in the specification which surface is being described, if the color designations set forth are for both surfaces then such should be stated in the specification, if the color designations set forth are for one surface, applicant should set forth which surface is being described and set forth the color designation(s) for the opposite surface.

**Detailed Action**

I. Page 2, line 3, Applicant states ribs and veins are “Darker than leaf surface”. Applicant should set forth in the specification the RHS color designation(s) for the rib and vein coloration. The recitation “Darker than leaf surface” is vague and insufficient in this regard.

J. Page 2, lines 5 and 8, Applicant states petiole color is “Medium green” and stem/branch color is “Medium Green”, respectively. Applicant should set forth in the specification the color designation(s) which represents “Medium green” (“green” either capitalized or in lowercase) with reference to the employed color chart. The recitations “Medium green” (“green” either capitalized or in lowercase) are vague and insufficient in this regard.

K. Page 2, lines 5 and 6, Applicant should set forth in the specification additional information relative to the instant plant’s petioles including the typical and observed petiole diameter.

L. Page 2, lines 8 and 9, Applicant should set forth in the specification additional information relative to the instant plant’s stems including the typical and observed length.

M. Applicant should set forth in the specification the typical and observed umbel diameter and depth when the flowers are open.

**Detailed Action**

N. Applicant should set forth in the specification the typical and observed number of inflorescences per plant and flowering season.

O. When compared to the photographic illustrations provided, filed March 19, 2001, it appears the petals have a small dot between their base and middle section. If such is accurate, applicant should account for same by setting forth in the specification the RHS color designation(s). Correction and/or clarification is necessary.

P. Page 2, line 30 and page 3, line 6, Applicant states "67C-D". It is uncertain whether applicant intends the color(s) set forth to be a mixture of the two color designations, a color that varies between the two color designations, or if each color is individually present. Correction and/or clarification is necessary.

Q. Applicant should set forth additional information in the specification relative to the instant plant's petals and petaloids such as the typical and observed apex, base, and margin descriptors for both petals and petaloids and length and width for petaloids.

**Detailed Action**

R. Page 3, line 3, Applicant states “Flakes”. Rather than saying the petaloid shape is “Flakes”, applicant should set forth in the specification a more appropriate botanical term for the petaloid shape. Correction and/or clarification is necessary.

S. Page 3, lines 9 and 12, Applicant states pedicel and peduncle color is “medium green”. Applicant should set forth in the specification the color designation which represents “medium green” with reference to the employed color chart. The recitation “medium green” is vague and insufficient in this regard.

T. Page 3, line 13, Applicant should delete “unusual” as this term is vague and meaningless in this instance.

U. Applicant should set forth in the specification information relative to the instant plant’s sepals such as the typical and observed quantity, length, width, apex, base, and margin descriptors, and coloration (both surfaces). Color designation(s) should be referenced by the employed color chart.

**Detailed Action**

V. Page 3, line 24, Applicant states there are five pistils per flower. Applicant should review the amount of pistils per flower as there may only be one pistil that is five parted. Correction and/or clarification is necessary.

W. Abstract, Applicant states "plant flower". This recitation does not make sense as it is unclear what applicant is intending. Correction and/or clarification is necessary.

X. Applicant states leaf color is "138A...". Applicant states upper surface color of the petal/petaloid is "68C". When compared to the photographic illustration provided (filed March 19, 2001), the recitations "138A" and "68C" do not look to reasonably correspond to the plant as illustrated. Correction and/or clarification is necessary. Should the source of the noted discrepancy be the photographic illustration(s), applicant must account for such in a meaningful manner, or (preferably) submit a substitute photographic illustration(s) wherein leaf and petal/petaloid color more reasonably corresponds to that set forth in the specification and the true coloration of the plant. Failure to address this situation could result in a future rejection under 37 CFR 1.165(a) for the illustration not being competently and/or artistically executed, as the illustration and the specification must reasonably correspond to each other and must faithfully depict/set forth the true and characteristic features of the plant.

**Detailed Action**

Y. Page 2, lines 21 and 22, Applicant states “Flowers on umbel; umbel on pedicel; pedicel on peduncle.”. The recitation does not appear to be accurate as flowers make up the umbel and flowers are connected to the pedicel not the umbel connected to the pedicel. It appears applicant meant to say “Umbel; flowers on pedicel; pedicel on peduncle.”. Correction and/or clarification is necessary.

The above listing may not be complete. Applicants should carefully review the disclosure and import into same any corrected or additional information which would aid in botanically identifying and/or distinguishing the cultivar for which United States Plant Patent protection is sought.

**Claim Rejection**

**35 U.S.C. 112, 1st & 2nd Paragraphs**

Claim 1 is rejected under 35 U.S.C. 112, first and second paragraphs as not being supported by a clear and complete botanical description of the plant for the reasons set forth in the Objection to the Disclosure Section above.

**Detailed Action**

**35 U.S.C. 102**

The claimed Geranium variety 'Penber' is described in Breeder's Right application number 981669 filed in the European Community on December 10, 1998 and published on February 15, 1999. The claimed Geranium variety 'Penber' is also described in Breeder's Right application number 03100 filed in Israel on September 9, 1999. Typically the UPOV member countries publish notice of the Plant Breeder's Right application filing. However, it is unknown to the Examiner when the Israel application was published. If the cultivar 'Penber' was disclosed in this publication and on sale to the public more than one year prior to the effective filing date of the instant application, then the instant application may be a bar under 35 U.S.C. 102. These published applications are each "printed publications" under 35 U.S.C. 102 because they are accessible to persons concerned with the art to which the documents relate. See *In re Wyer*, 655 F.2d 221, 226, 210 USPQ 790, 794 (CCPA 1981). See also MPEP § 2128. For example, UPOV publishes the application number, date of publication, species of plant and variety denomination for PBR certificates, and copies of the European application, 981669, are obtainable through the European Communities Register of Applications for Community Plant Variety Rights. This register is open to public inspection and the information in this register is published every two months. Copies of the Israel application, when published, 03100, are obtainable through a Register of Rights and are published in the Reshumot and in a professional journal in the field of agriculture. All documents which are related to this particular application are public. Thus

**Detailed Action**

information regarding the claimed variety, in the form of the publications noted above, was readily available to interested persons of ordinary skill in the art.

A printed publication can serve as a statutory bar under 35 U.S.C. 102(b) if the reference, combined with knowledge in the prior art, would enable one of ordinary skill in the art to reproduce the claimed plant. *In re LeGrice*, 301 F.2d 929, 133 USPQ 365 (CCPA 1962). If one skilled in the art could reproduce the plant from a publicly available source, then a publication describing the plant would have an enabling disclosure. See *Ex parte Thomson*, 24 USPQ 2d 1618, 1620, (Bd. Pat. App. & Inter. 1992)(“The issue is not whether the [claimed] cultivar Siokra was on public use or sale in the United States but, rather, whether Siokra seeds were available to a skilled artisan anywhere in the world such that he/she could attain them and make/reproduce the Siokra cultivar disclosed in the cited publications.”).

While the publications cited above disclose the claimed plant variety, a question remains as to whether the references are enabling. If the plant was publicly available, then the applications combined with knowledge in the prior art, would enable one of ordinary skill in the art to reproduce the claimed plant. The ability of the Office to determine whether the claimed plant was publicly available is limited. Search of electronic databases, the internet and the Office’s collection of retail catalogs has not revealed any evidence that the claimed plant was on sale anywhere in the world. However, the Office’s collection of retail catalogs is not comprehensive. Furthermore, the claimed plant may have been sold at the wholesale level, sold under a different

**Detailed Action**

name, or even distributed to interested parties free of charge. Since the inventor and assignee of the instant application are in a better position to know when, if ever, the claimed plant was made publicly available, the Examiner is requiring this information in the attached Requirement for Information Under 37 CFR 1.105.

This Office action has an attached requirement for information under 37 CFR 1.105. A complete reply to this Office action must include a complete response to the attached requirement for information. The time period for reply to the attached requirement coincides with the time period for reply to this Office action.

**Future Correspondence**

Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Kent L. Bell whose telephone number is (703) 306-3224. The Examiner can normally be reached Monday through Thursday from 6:00 am to 4:30 pm.

If attempts to reach the Examiner by telephone are unsuccessful, the Examiner's supervisor, Bruce Campell, can be reached at (703) 308-4205.

The fax phone number for the group is (703) 305-3014 or 308-4242.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0196.

K. L. Bell

*K. L. Bell*

**Detailed Action**

**REQUIREMENT FOR INFORMATION UNDER 37 CFR 1.105**

Applicant and the assignee of this application are required under 37 CFR 1.105 to provide the following information that the examiner has determined reasonably necessary to the examination of this application.

The information is required to determine when, if ever, the claimed plant variety, 'Penber', was publicly available prior to the filing date of the instant application.

In response to this requirement please provide any information available regarding the sale or other public distribution of the claimed plant variety anywhere in the world, including the date(s) of any sale or other public distribution. Also, please provide copies of the published applications, 981669 and 03100 (if published). The Office does not maintain a collection of Breeders' Rights documents and they are not readily obtainable electronically. It is reasonable to expect that Applicant can readily obtain the requested document(s) and information.

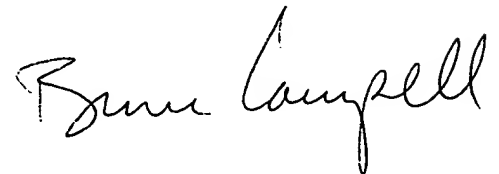

The fee and certification requirements of 37 CFR 1.97 are waived for those documents submitted in reply to this requirement. This waiver extends only to those documents within the scope of this requirement under 37 CFR 1.105 that are included in applicant's first complete communication responding to this requirement. Any supplemental replies subsequent to the first communication responding to this requirement under 37 CFR 1.105 are subject to the fee and certification requirements of 37 CFR 1.97.

**Detailed Action**

Applicant is reminded that the reply to this requirement must be made with candor and good faith under 37 CFR 1.56. Where applicant does not have or cannot readily obtain an item of required information, a statement that the item is unknown or cannot be readily obtained will be accepted as a complete response to the requirement for that item.

This requirement is an attachment of the enclosed Office action. A complete reply to the enclosed Office action must include a complete response to this requirement. The time period for reply to this requirement coincides with the time period for reply to the enclosed Office action, which is three months.

BRUCE R. CAMPELL, PH.D  
SUPERVISORY PATENT EXAMINER  
TECHNOLOGY CENTER 1600
